

## PAPERS 1964-2003 BY R.K. ECKHOFF

Eckhoff, R.K.: A Note on Measurement of Degree of Mixing of Fluids. *Chem. Engng. Sci.* Vol.19 (1964) pp. 835-838

Eckhoff, R.K.: Småpartikkelsystemer - måling og spesifisering av størrelses-egenskaper. *Teknisk Ukeblad* (1965) No. 43. English translation of title: "Small particle systems – measurement and characterization of particle size properties"

Eckhoff, R.K.: Coulter-telleren - en alternativ metode for telling og klassifisering av småpartikler. *Tidsskrift for Kjemi, Bergvesen og Metallurgi* Vol.12 (1965) pp. 269-274. English translation of title: "The Coulter counter – an alternative method for counting and size classification of small particles"

Eckhoff, R.K.: A Rapid Method for Preparing a Random Distribution of Small Particles for Electron and Light Microscopy. *The Microscope & Crystal Front* Vol. 14 (1965) pp. 490-497

Eckhoff, R.K.: The Use of Membrane Filters in the Preparation of Samples for Electron Microscopic Examination of the Sizes and Shapes of SubSieve Particles. *The Microscope & Crystal Front* Vol. 15 (1966) pp. 136-142

Eckhoff, R.K.: Determination of the Solid Volume Percentage Below Detectable Size in Coulter-Counter Analysis. *Nature* Vol. 210 (1966) pp. 765-766

Eckhoff, R.K. and Soelberg, P.: The Use of the Coulter-Counter in Particle Size Analysis of Cement and Raw Mix. *Betongtekniske Publikasjoner* (1967) No. 7

Eckhoff, R.K.: Experimental Indication of the Volume Proportional Response of the Coulter-Counter for Irregularly Shaped Particles. *J. Sci. Instrum.* Vol. 44 (1967) pp. 648-649.

Eckhoff, R.K.: Size Analysis of Polymer Latex Powder. Comparison of Results Obtained by Means of the ICI-Joyce Loeb Disc Centrifuge, the Coulter-Counter and the Electron Microscope. *J. Appl. Polymer Sci.* Vol. 11 (1967) pp. 1855-1861

Eckhoff, R.K and Erga, O.: Luftforurensning - en oversikt over problemkomplekset. *Teknisk Ukeblad* (1967) No. 12. English translation of title: "Air pollution – a review of the problem complex"

Eckhoff, R.K.: A Static Investigation of the Coulter Principle of Particle Sizing. *J. Sci. Instrum. (J. Physics E)* (1969) pp. 973-977.

Eckhoff, R.K.: Karakterisering av partikler i aerosoler. Reprint of paper given at a *Scandinavian Clean-Room Symposium in Sandefjord*, April (1970). English translation of title: "Characterization of particles in aerosoles"

Eckhoff, R.K.: Noen generelle betraktninger omkring kornstøvekspløsjonen ved Stavanger Havnesilo. *Industrivern-Nytt* (1971) No. 1. English translation of title: "Some general considerations in relation to the grain dust explosion at Stavanger Harbour Silo"

Eckhoff, R.K.: Støvekspløsjoner - en aktuell trussel? *Teknisk Ukeblad* (1971) No. 47. English translation of title: "Dust explosions – a real threat?"

Eckhoff, R.K. and Utvik, A.O.: Effects of Particle Characteristics on Bulk Properties of Norwegian Fish Meals. *J.Sci. Fd. Agric.* Vol. 22 (1971) pp. 641-646

Leveresen, P.-G. and Eckhoff, R.K.: Massestrømningssiloer - et attraktivt alternativ. *Kjemi* (1973) No. 9. English translation of title: "Mass flow silos – an attractive alternative".

Eckhoff, R.K. and Leveresen, P.-G.: A Further Contribution to the Evaluation of the Jenike Method for Design of Mass Flow Hoppers. *Powder Technology* Vol. 10 (1974) pp. 51-58

Eckhoff, R.K.: Towards Absolute Minimum Ignition Energies for Dust Clouds? *Combustion & Flame* Vol. 24 (1975) pp. 53-64

Eckhoff, R.K. and Enstad, G.G.: Derivation of Particle Size Distributions from Measurements on Plane Sections Through Particle Beds. Effect of Regularity of Particle Packing. *Powder Technology* Vol. 11 (1975) pp. 1-10

Eckhoff, R.K.: *Factors Affecting the Dispersibility of Powders*. Chr. Michelsen Institute, Beretninger XXXIX, 3, John Griegs Boktrykkeri, Bergen (1976)

Eckhoff, R.K.: *Some Aspects of the Dry Mixing of Powders*. Chr. Michelsen Institute, Beretninger XXXIX, 4, John Griegs Boktrykkeri, Bergen (1976).

Eckhoff, R.K. and Enstad, G.G.: Why are 'Long' Electric Sparks more Effective Dust Explosion Initiators than 'Short' Ones? *Combustion & Flame* Vol. 27 (1976) pp. 129-131

Eckhoff, R.K.: The Use of the Hartmann Bomb for Determining  $K_{St}$  Values of Explosible Dust Clouds. *Staub-Reinhalt. Luft* 37 Vol. (1977) pp. 110-112.

Eckhoff, R.K.: Pressure Development During Dust Explosions in Clouds of Dusts from Grain, Feedstuffs and Other Natural Organic Materials. *Fire Research*, Vol.1 (1977/78) pp. 71-85

Eckhoff, R.K.: A Critical Examination of the Effect of Dust Moisture on the Rate of Pressure Rise in Hartmann Bomb Tests. *Fire Research* Vol. 1 (1977/78) pp. 273-280.

Eckhoff, R.K.: Auslösung von Staubexplosionen durch elektrische Funken. *VDI-Berichte No. 304* (1978) pp. 61-67. Verein deutscher Ingenieure, Dusseldorf, Germany.

Eckhoff, R.K.: Necessary Vent Areas for Grain and Feedstuffs Dust Explosions. *Cereal Foods World*, Vol. 23 (1978) pp. 650-656

Eckhoff, R.K., Leversen, P.-G. and Schubert, H. (Karlsruhe): The Combination of Tensile Strength Data of Powders and Failure Loci from Jenike Shear Tests. *Powder Technology* Vol. 19 (1978) pp. 115-118

*Dust Clouds: Minimum Explosible Dust Concentration*. Nordtest Method NT Fire 011. Edition 1 approved June 1980.

Moen, I., Lee, J.H.S., Hjertager, B.H., Fuhre, K. and Eckhoff, R.K.: Pressure Development Due to Turbulent Flame Propagation in Large-Scale Methane-Air Explosions. *Combustion & Flame* Vol. 47 (1982) pp. 31-52

Eckhoff, R.K.: Current Dust Explosion Research at the CMI. Chapter of *Fuel-Air Explosions*, edited by J.H.S. Lee and C.M. Guirao, University of Waterloo Press (1982) pp. 657-678

*Dust and Powder Layers: Electric Spark Sensitivity*. Nordtest Method NT Fire 016. Approved September 1982.

Eckhoff, R.K.: Relevance of Using  $(dp/dt)_{max}$  Data from Laboratory-Scale Tests for Predicting Explosion Rates in Practical Industrial Situations. *VDI-Berichte No. 294* (1984) pp. 207-217. Verein deutscher Ingenieure, Dusseldorf, Germany.

Eckhoff, R.K., Fuhre, K., Guirao, C.M. and Lee, J.H.S.: Venting of Turbulent Gas Explosions in a 50 m<sup>3</sup> Chamber. *Fire Safety Journal* Vol. 7 (1984) pp. 191-197

Eckhoff, R.K. and Fuhre, K.: Dust Explosion Experiments in a Vented 500 m<sup>3</sup> Silo Cell. *J. Occup. Accidents* Vol. 6 (1984) pp. 229-240

Eckhoff, R.K.: Tryckavlastning av dammexplosioner i 500 m<sup>3</sup> silocell. *Arbetarskyddsfondens Sammanfattningar* No. 767 (1984).

Eckhoff, R.K.: Use of  $(dp/dt)_{max}$  from Closed-Bomb Tests for Predicting Violence of Accidental Dust Explosions in Industrial Plants. *Fire Safety Journal* Vol. 8 (1984/85) pp. 159-168

Eckhoff, R.K.: Influence of Turbulence on Maximum Pressure Generated in Dust Explosions in a Vented 500 m<sup>3</sup> Silo Cell. *Archivum Combustionis* Vol. 5 (1985) pp. 69-82

Eckhoff, R.K., Parker, S.J., Gruvin, B., Hatcher, M. and Johansson, T.: Ignitability and Explosibility of Silicon Dust Clouds. *Journ. Electrochem. Soc.* Vol. 133 (1986) No. 12, pp. 2631-2637.

Eckhoff, R.K.: Sizing Dust Explosion Vents - A Problem of Risk Assessment. *Archivum Combustionis* Vol. 6 (1986) pp. 213-226.
